ECOW-21U550

21U Wall-Mount Enclosure

21U, 550mm deep enclosure

FREE FITTED ENCLOSURE ACCESSORY
VENTED FIXED SHELF

Structured Cabling

Switching and Routing

PBX and CCTV

Your ideal enclosure for small to medium-scale networking and PBX

Are you looking for medium-scale deployment for your networking, PBX or CCTV applications, contained in a wall-mount solution?

The new **ECOW-21U550** offers one of the highest load-carry capacities in the industry and gives installers and IT integrators an alternative to the normal floor-standing counterparts. Full 19-inch front and rear uprights are compatible with almost all rack-mount devices including switches, patch panels and CCTV equipment.

With extra 550mm depth means not only can you deploy deep active products but also allow better airflow around the equipment and thus keep your MTBF to an absolute minimum.

With a heavy-duty, quality powder-coated finish, multiple cable entry and door alignment configurations make the **ECOW-21U550** your ideal solution.
