SW50010-D

5-Port
Fast Ethernet
Desktop Switch

Add extra devices with fast ethernet performance

Broadband & workstations	IP-CCTV & video VoIP	NAS Storage	Multimedia & game consoles

Extreme affordability for your personal network

Looking to expand your home or personal LAN at the lowest possible price?

The new Dynamode **SW50010-D** is one of the most competitively priced desktop switches on the market today. Allowing instant expansion to your existing broadband router setup, your small office network, or for example, adding extra ethernet points to a classroom.

Unlike other vendor offerings, the SW50010-D has a very small form-factor meaning it can be deployed almost anywhere, under a desk, on the wall or more conventionally, on a desktop.

Featuring 5 fast ethernet (100BaseT) ports that are able to communicate at 200Mbps fast-duplex mode, means the chances are its faster than your existing fast ethernet devices. With silent operation, full status LEDs showing all 5-port operation coupled with a low-energy power supply means the SW50010-D is your ideal personal LAN partner!

specifications:

5-port Fast (100/10Mbps) ethernet switch

200Mbps transfers in full-duplex operation*

Ideal for home networks - NAS, IP camera, game consoles

Ideal for expanding ports on your Broadband router

Fully Plug 'n Play - works on all TCP operating systems
