

Connectors Cables Specialists (CCS) Ltd

PFAS - Product declaration

Product Description: All connectors, cables and accessories

Declaration

To the best of our knowledge, Connectors Cables Specialists (CCS) Ltd does not intentionally add/specify Per and Polyfluoroalkyl Substances (PFAS) as a raw material or processing aid in the manufacturing of our products.

Our statement is based upon information provided to us by the suppliers of raw materials, components, assemblies, and processing aids used to manufacture our products.

The vast majority of and connectors, cable and accessories do not contain any PFAS substances. Only a selection of coaxial connectors and cables with PTFE insulation and/or jacketing could be considered to contain PFAS.

PTFE is an extremely stable molecule and resistant to degradation. PTFE does not break down to be a source of non-polymer PFAS unless exposed to extremely harsh temperatures or chemicals that would themselves have a negative impact on human life.

This declaration applies to the products as they leave our facility. It does not cover any substance(s) or preparation(s) subsequently added and/or in expert material processing or article fabrication further down the supply chain.
